

Business People in the Classroom
A Mifflin County Education and Scholarship Foundation Event

Mifflin Country Education and Scholarship Foundation believes that regular interaction between our local business community and our schools is mutually beneficial to both groups. Businesses can learn about the attitudes and aspirations of students, and students can learn the latest about what goes on in local businesses and what businesses need in the students they are hiring.

If your school is interested in holding a forum in your school at which your students can interact with local business people, please complete this outline summary and fax it to us at 242-1842, or e-mail us this information at JeffGum@verizon.net.

School _____
Person Completing this Form _____
Phone _____ **E-mail** _____
